

**CUSTOMER INFORMATION  
AS PER REACH  
REGULATION (EC) NO.  
1907/2006**

**Version 2.0  
July 2024**

The EU Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) aims to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. For more details, see the information provided by the European Chemicals Agency (ECHA): [LINK](#).

Hilti Corporation is primarily a downstream user for the purpose of REACH for the use of chemical substances in materials of articles. In accordance with Art. 33 and Art. 59(1,10), Hilti must inform downstream customers if any so-called Substances of Very High Concern (SVHC) are contained in our articles in a concentration above 0.1% weight by weight. More details on the Candidate List of Substances of Very High Concern for Authorisation can be found here: [LINK](#). Changes to this list and to other relevant substance lists regulated by ECHA are diligently monitored at Hilti.

Single inner components of certain power tools, mechanical anchors and installation articles contain Lead (CAS-No. 7439-92-1) as an alloying element in steel, aluminium, and copper alloys in concentrations above 0.1% w/w. Single electronic components of certain power tools, like switches and ceramic capacitors, contain Cadmium oxide (CAS-No. 1306-19-0), Cadmium compounds & Lead compounds above 0.1% w/w. Furthermore, also in the area of power tools, certain tool displays contain Bisphenol A (CAS-No. 80-05-7) and certain motor sealings contain 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol (CAS-No. 119-47-1) in concentrations above 0.1% w/w. Lastly, certain articles within our direct fastening portfolio, primarily cartridges, contain Lead styphnate (CAS-No. 15245-44-0) above 0.1% w/w.

Cadmium oxide, Lead, Lead & Cadmium compounds, Bisphenol A, 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol and Lead styphnate are all classified as SVHC.

Certain chemical products including single oils, greases, fire protection chemical products and chemical anchors may contain substances classified as SVHC above 0.1% w/w. For more information, please refer to Chapter 15 of the Safety Data Sheets (SDS) of our products, which can be found on the respective product webpages. In line with regulatory requirements for SDS, Chapter 15 contains information on any SVHC present within chemical mixtures.

For more information about SVHC in our products and about our products in general, please reach out to your Hilti contact persons.
